

## COMPACT HIGH-PRESSURE DEVICE FOR HYDRODYNAMIC SEWER CLEANING

The AGROJET series is a compact, modern and universal high-pressure device designed for unclogging and cleaning sewage system pipes, drains, disinfecting surfaces or objects and other cleaning works.

The device was developed and is manufactured by the Polish company KanRo Ltd, a leader in the market of specialist sewage service devices with over 30 years of experience. Thanks to its small dimensions and weight, AGROJET is ideally suited for mounting on tractors and backhoe loaders.

AGROJET is a "multi-purpose" set that is driven by the tractor engine's power take-off shaft. The device is equipped with a hydraulic drive for a pressure hose reel. AGROJET is ideal for hard-to-reach areas.

## AVAILABLE DEVICE VERSIONS

### AGROJET 150/50

- Drive: PTO shaft
- High-pressure pump:
  - pressure 150 bar
  - water flow 50 l/min
- High-pressure hose  
DN13 60 m ½"
- Water tank 1000 liters
- Indicative scope of use:  
pipes up to 300 mm

### AGROJET 150/75

- Drive: PTO shaft
- High-pressure pump:
  - pressure 150 bar
  - water flow 75 l/min
- High-pressure hose  
DN13 80 m ½"
- Water tank 1000 liters
- Indicative scope of use:  
pipes up to 400 mm

### AGROJET 200/30

- Drive: PTO shaft
- High-pressure pump:
  - pressure 200 bar
  - water flow 30 l/min
- High-pressure hose  
DN10 80 m ½"
- Water tank 1000 liters
- Indicative scope of use:  
pipes up to 250 mm

### Main advantages of the device:

- ✓ Mounting on tractors and backhoe loaders
- ✓ Simple one-person operation
- ✓ Hydraulic drive of the working reel\*
- ✓ High-class high-pressure pump
- ✓ Very large water tank
- ✓ Winter protection system
- ✓ Wide range of additional equipment
- ✓ Made in Poland
