

## COMPACT HIGH PRESSURE TRAILER FOR HYDRODYNAMIC SEWER CLEANING

The KOBRA series was developed and is manufactured by the Polish company KanRo Ltd based on more than 30 years of experience in the production, sale and servicing of this type of equipment.

The lightweight KOBRA series trailer is a modern, efficient high-pressure device designed for unclogging and cleaning sewage system pipes, as well as for disinfecting surfaces or objects. The KOBRA device is universal, functional, and small in size.

The specially designed and applied construction and arrangement of individual elements guarantee optimal weight distribution of the entire set. KOBRA is ideal for places where large cleaning vehicles cannot reach and in hard-to-reach places.

## AVAILABLE CONSTRUCTION VERSIONS

### KOBRA 150/50

- 22 HP petrol engine
- High pressure pump:
  - pressure 150 bar
  - water flow 50 l/min
- High pressure hose DN13 60 m 1/2"
- Water tank 400 liters
- Filling hose or additional high pressure hose\*
- Approximate scope of application: pipes with a diameter of up to 300 mm

### KOBRA 150/75

- 35 HP petrol engine
- High pressure pump:
  - pressure 150 bar
  - water flow 75 l/min
- High pressure hose DN13 60 m 1/2"
- Water tank 400 liters
- Filling hose or additional high pressure hose\*
- Approximate scope of application: pipes up to 400 mm in diameter

### Main advantages of the device:

- ✓ Simple one-person operation
- ✓ Hydraulic drive of the working reel
- ✓ High-class engine and high-pressure pump
- ✓ Large water tank adapted to the vehicle's load capacity
- ✓ Winter protection system
- ✓ Remote radio control for increased work comfort\*
- ✓ Wide range of additional equipment
- ✓ Made in Poland
