

COMBI

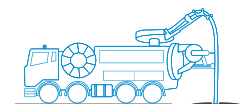

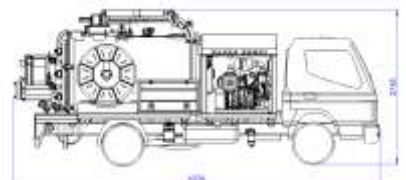

MUNICIPAL JETTING-SUCTION VEHICLES FOR HYDRODYNAMIC SEWAGE CLEANING

KanRo COMBI are valued, proven and reliable specialist designs manufactured by the Polish company KanRo Ltd, a leader on the market of sewage service equipment with 30 years of experience. These are universal municipal vehicles designed to perform sewage works, cleaning sewage and rainwater networks, servicing domestic sewage treatment plants and small sewage pumping stations. These vehicles are characterized by a compact body, low own weight and excellent maneuverability.

We offer 3 types of vehicles, mainly differentiated by the size of the tank: COMBI 7000, COMBI 3500 and COMBI 1200. The division of tanks into clean water and wastewater is adapted to the customer's needs. The devices are mounted on 2-axle car chassis or trailers with an appropriate load capacity.

AVAILABLE CONSTRUCTION VERSIONS

COMBI 1200

- 40 HP petrol engine
- Pressure 140 bar
- Water output 70 l/min
- DN13 pressure hose 80m 1 "
- 260 m3/h suction pump
- DN60 suction hose
- Tank: 400 l water / 800 l waste
- Hydraulic drive of the working reel
- Side rotary suction drum*
- DMC 3500 kg

COMBI 3500

- Diesel engine 59 HP
- Pressure 150 bar
- Water flow 100 l/min
- Pressure hose DN16 100m 1 "
- 720 m3/h Suction pump
- Suction hose DN75
- Tank: 1000 l water / 2000 l waste
- Hydraulic drive of the working reel
- Side rotating suction reel*
- Suction tower*

COMBI 7000

- PTO
- Pressure 140 bar
- Water output 210 l/min
- Pressure hose DN25 120m 1 "
- 1150 m3/h Suction pump
- Suction hose DN100
- Tank: 2500 l water / 4500 l waste
- Hydraulic drive of the working reel
- Side rotating suction reel*
- Carousel suction boom*

Main advantages of the device:

- ✓ Possibility of using remote control and/or automatic pressure hose laying device*
- ✓ Solid and compact design
- ✓ High power and efficiency of operation
- ✓ High technical parameters
- ✓ Hydraulic drive for tilting the working reel*
- ✓ Hydraulic drive for the suction reel*
- ✓ Hydraulically lifted bottom*
- ✓ Hydraulic bottom locks*
- ✓ Possibility of configuring the division of tanks*
- ✓ Winter protection system*
- ✓ Reversing camera*, additional vehicle lighting*
- ✓ Aluminum roller shutters of the engine compartment
- ✓ A wide range of additional equipment
- ✓ Additional pressure or filling reel*
- ✓ Polish production
