

PYTHON 2.0

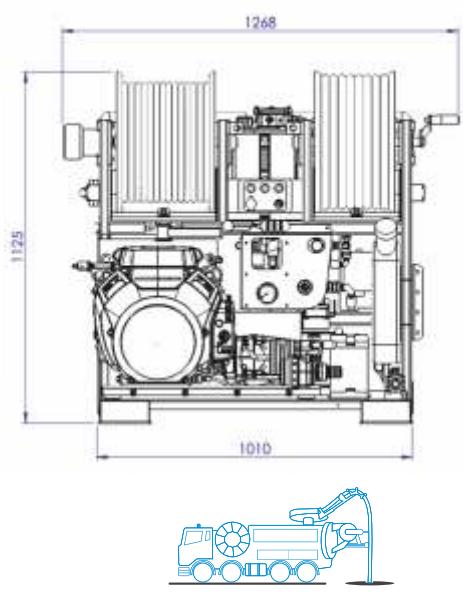

COMPACT HIGH PRESSURE DEVICE FOR HYDRODYNAMIC SEWER CLEANING

The PYTHON 2.0 series was developed and is manufactured by the Polish company KanRo Ltd based on over 30 years of experience in the production, sale and servicing of this type of equipment.

Thanks to its compact design and very low weight, PYTHON 2.0 can be mounted on a transport trailer, as well as in a delivery van of any brand.

The device will work perfectly in places that are difficult to access for other cleaning vehicles, e.g. narrow city streets, underground garages, home sanitary and rainwater installations.

AVAILABLE CONSTRUCTION VERSION

PYTHON 2.0 - 150/50

- ▶ 22 HP petrol engine
- ▶ High pressure pump
 - pressure 150 bar
 - water flow 50 l/min
- ▶ DN13 high pressure hose 60 m 1 "
- ▶ 500 litre water tank
- ▶ Hydraulic drive of the working reel*
- ▶ Radio remote control*
- ▶ Filling hose or additional high pressure hose*
- ▶ Installation on a trailer or in a delivery van
