

TAJPAN 2.0

COMPACT HIGH PRESSURE DEVICE FOR HYDRODYNAMIC SEWER CLEANING

TAJPAN series was developed and is manufactured by the Polish company KanRo Ltd based on over 30 years of experience in the production, sale and servicing of this type of equipment.

TAJPAN 2.0 is a functional and efficient high-pressure device designed for unclogging and cleaning sewage system pipes, as well as for disinfecting surfaces or objects. This is a universal device with very small dimensions, equipped with an electric or petrol engine. It is ideal for hard-to-reach places where cleaning vehicles cannot reach.
